## Saving Grids

After completing grid edits, you must save the changes so you can share them with your neighboring offices and publish the grids to the Official database.

Step	Action	Notes
1	Select **Edit => Save Forecast...** from the Menu Bar, or click the **Save Forecast** button in the Button Bar.	
2	Select the elements you want to save from the **Save** Forecast dialog (example image below). 	By default, all elements with unsaved grids are included on the interface and selected.
3	Click **Save Forecast**. *Result*: The grids are now saved.
